

# Industrial Robotics Automation Catalog Product Datasheets

## Omron's 5 benefits

The new Omron Robotic Automation enhances the most demanding manufacturing lines providing

## **Quick Delivery**

5 huge automated warehouses to provide parts in short time.

### Simple

Shortening the startup and maintenance time by the integrated software environment that controls the line.

### **Efficient**

All the production data coming from robots, controllers, sensors are collected, shared and managed to optimize the productivity.

#### **Flexible**

Software assisted system generates automatically the new programming code.

## Industrial robots - Three robot families with over 100+ models

#### Manufacturing site innovation by using robots for various applications

Omron offers robotic automation solutions for applications from cutting-edge production facilities to manual operation processes by using our wide variety of control devices and integrating robotics into automation.

Hornet 565 Quattro 650/800

#### SCARA robots

The high-performance four-axis SCARA product family is ideal for precise mechanical assembly, material handling, packaging, and screw driving.

## Advanced Robotics Integrated Solution

The advanced robotics integrated solution is the world's first truly combined robotics and automation ecosystem designed to optimize the entire design and manufacturing cycle.

It provides a unified environment for Omron's strong robotics portfolio with the state of the art Omron NJ501-R machine controller and Sysmac Studio software.

#### **Benefits**

#### **Control Integration**

Simplify integration with unified control of robots and machines - traditionally performed by separate controllers - enabling intimate coordination between peripheral devices and robots to deliver automation systems that can achieve unprecedented levels of intricacy and dexterity.

#### Integration of building process

Seamlessly integrate the entire process flow throughout design, commissioning, operation and its maintenance - to resolve labor shortage in both production line development and implementation, reduce time to market.

#### Components

#### **OMRON ROBOTS**

Our line of integrated eCobra SCARA robots now come with real-time EtherCAT connectivity to an Omron NJ501-R.

#### **OMRON NJ501-R**

Integrated machine and robotics controller that offers top performance and scalability, by seamlessly combining motion, robotics, logic, IO, and safety.

#### **SYSMAC Studio**

Unified software platform to simulate, deploy, control, and monitor robotics alongside the Omron automation ecosystem.

#### **Application Manager**

Application-level runtime environment for vision, recipe management and robot application modules like PackManager.

SCARA EtherCAT slave robot

Machine Automation Controller and robot EtherCAT master

Sysmac Studio software to simulate and program applications

## Standalone Robotics

Our full portfolio of high performing, reliable, and industry-proven robots can optimally address the most demanding robotics applications.

By programing our robots with the simple and easy to use software, robot applications can be developed effortlessly and commissioned fast.

#### Benefits

#### **Top Value**

High performing robotics and flexible platform to integrate diverse robotics applications in auto, digital, pharma, and F&B industries.

#### Ease of Integration

Simplify integration with a powerful yet easy-touse development environment for robotics, vision, feeding, and packaging applications.

#### Reliability

Long-lasting and proven hardware and software with thousands of robots deployed worldwide, backed-up by Omron's industry leading support network.

#### Components

#### **OMRON Robotics**

Our full line of SCARA, parallel, and articulated robots support traditional standalone deployments as well as connectivity to controllers.

#### **Automated Control Environment (ACE)**

PC-based development software to easily program Omron's portfolio of robots, vision and feeding systems.

#### **Application Manager**

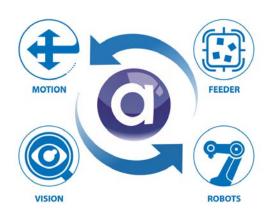

Application-level runtime environment for vision, recipe management and robot application modules like PackManager.

#### ePLC

Software option to enable robot communication with Omron NX/NJ/NY or third party PLCs via Ethernet.

Full suite of robots with Ethernet connectivity

ACE software for application development

## Parallel Robots **iX3-565**

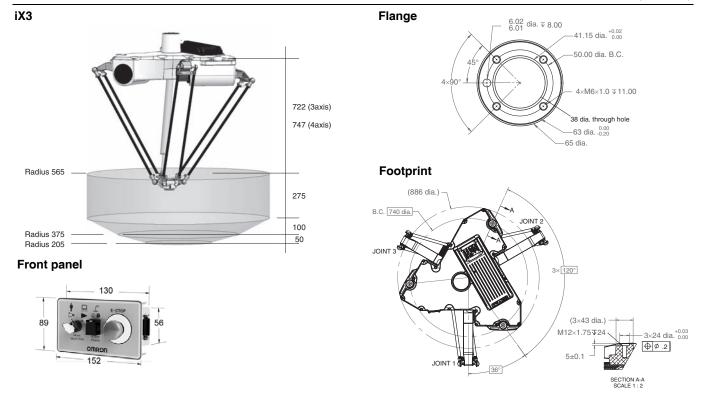

#### Parallel robot ideal for use in the food and beverage, pharmaceutical, and healthcare industries

- EtherCAT connectivity to the Omron NJ501-R controller and programming through the familiar IEC 61131-3 programming language or scripting (eV+).
- Tracks up to a conveyor speed of 1.4 m/s
- Designed with a high payload to support multi-hand (multi-picking)
- Supports fast Pick & Place on a fast conveyor
- Helps reduce mounting cost and robot vibration
- Maximum working diameter 1,130 mm
- Working height 425 mm
- Maximum payload 8 kg
- Weight 52 kg

## iX4-650H/HS

EtherCAT (NJ501-R) version

## Four-axis parallel robot achieves high speed and high precision

- EtherCAT connectivity to the Omron NJ501-R controller and programming through the familiar IEC 61131-3 programming language or scripting (eV+).
- Four-axis arm evenly distributes the load on the robot
- Fast and high-precision conveyance and assembly
- Designed with a high payload to support multi-hand (multi-picking)
- Supports fast Pick & Place on a fast conveyor
- Meets the sanitary standards of the United States Department of Agriculture for prevention of product contamination
- Maximum working diameter 1,300 mm
- Working height 500 mm
- Maximum payload 15 kg
- Weight 117 kg

#### **Machine Automation Controller**

## NJ501-R Series

## Controller that covers functions and high-speed processing required for machine control and safety, reliability and maintainability.

- Integration of Robotics, Logic, and Motion in one CPU
- Conforms to IEC 61131-3 (JIS B 3503) standard programming and PLCopen function blocks for Motion Control
- Conforms to IEC 61131-3 (JIS B 3503) standard programming and traditional V+ scripting for robot and motion control
- Programming with variables allows users to create complex programs efficiently.
- Offers speed without compromising on reliability and robustness expected from PLCs
- Complete RAS Functions: Transmission frame error check, timeout, bus diagnosis, Watchdog (WDT), memory check, and topology check, etc.
- Offers speed without compromising on reliability and robustness expected from PLCs.
- Linear and circular interpolation.
- Electronic gear and cam synchronization
- Fast and accurate control by synchronizing all EtherCAT devices, such as vision, servos, robots, and IO with the controller.
- Offers speed without compromising on reliability.

Item		Product Description		
Product Name		NJ501-R[ ][ ][ ]		
Description		Machine controller with sequence, motion, and robotics functionality		
Software		Sysmac Studio		
Programming		IEC 61131-3 (Ladder, Structured Text, Function Blocks) eV+ Scripting		
Program Capacity		20 MB		
Memory Card		SD/SDHC memory card		
Variable Capacity	No retain attribute	4 MB		
	Retain attribute	2 MB		
Built-in Ports	•	EtherCAT, Ethernet/IP, USB 2.0		
Number of EtherCAT slaves		192		
Max Number of robots		8		
Max Number of Axes		64, 32, 16		
Ordering Information		P072 Sysmac Catalog		

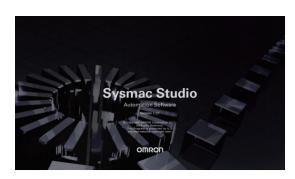

#### **Automation Software**

## Sysmac Studio Ver.1 [] []

#### Sysmac studio for machine creators

Sysmac Studio provides an integrated development environment to CPU Units, NY-Series, Industrial PC, and other Machine Automation Controllers, as well as EtherCAT slaves

- One software for motion, logic sequencing, robots, safety, drives, vision and HMI.
- Fully compliant with open standard IEC 61131-3.
- Supports Ladder, Structured Text and Function Block programming with a rich instruction set and eV+ programming language for robotics.
- CAM editor for easy programming of complex motion profiles.
- Machine and Robot integrated simulation in a 3D environment.
- Advanced security function with 32 digit security password
- Capable of configuration robotics Application modules (Pack Manager, Robot Vision Manager).

#### **System Requirements**

Item	Product Description			
Ordering Information	Sysmac Studio Ver.1.[][] Datasheet			
Item	Requirement			
Operating system (OS) *1 *2	Windows 10 (64-bit)			
CPU *2	DOS/V (IBM AT compatible machines) personal computers equipped with Intel® Core™ i5-3xxx (3rd generation: Ivy Bridge) or equivalent/later processors are required.			
Main memory *2	4 GB min. 8 GB min. recommended.			
Hard disk	Minimum 8 GB of Hard disk space is required to install.			
Display	XGA 1024 × 768, 16 million colors. WXGA 1280 × 800 min. recommended			
Communications ports	USB port corresponded to USB 2.0, or Ethernet port *3			
Supported languages	Japanese, English, German, French, Italian, Spanish, simplified Chinese, traditional Chinese, Korean			

- \*1. Sysmac Studio Operating System Precaution: System requirements and hard disk space may vary with the system environment.
- \*2. If you create a user program with a memory size over 20 MB, the personal computer equipped with Intel® Core™ i7 or an equal/faster processor and the RAM of 8 GB or more is recommended.
- \*3. For hardware (e.g. PC and CPU unit) connection methods and cables, refer to each hardware manuals.

Note: System environment for 3D simulation Option is as follows.

- DOS/V (IBM AT compatible machines) personal computers equipped with Intel® Core™i5 8250U (1.60-3.40 GHz) or equivalent/faster processors Intel® Core™ i7 9750H min. recommended.
- 8 GB RAM min.
- 16 GB RAM min. recommended
- 1920 x 1080, 16 million colors full HD display min.

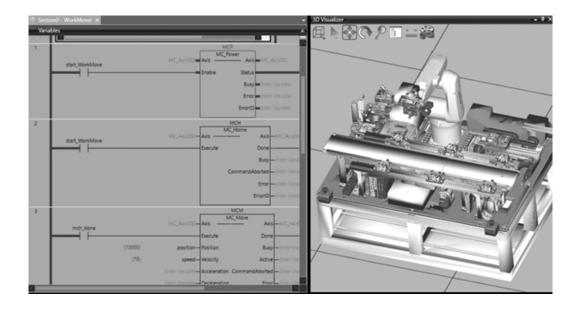

Video card: NVIDIA® GeForce® GTX1650 Ti min. recommended

#### Sysmac Studio 3D Simulation

Sysmac Studio 3D Simulation simplifies operational simulations of manufacturing facilities by simply adding optional licenses for simulation functions to the Sysmac Studio programming software. Operational simulation of robots and peripheral equipment can be performed with high accuracy and real-time. In addition, this product enables visualization and preliminary verification of machine behavior before it is actually started up, thus the time required to confirm the production capacity of the equipment, start-up, and modification is shortened.

#### Main Features:

- Use only the Sysmac Studio with loaded 3D CAD data\*1 for 3D simulations. Operation of a control program created during machine development can be verified in a virtual environment. This improves program accuracy during design, reducing rework at verification using physical devices and saving development time.
- Simulations can be used to test feasibility during process design or to share the same understanding between mechanical and electrical designers during operation design, improving design quality and engineering efficiency.

Item	Product Description		
Ordering Information	Sysmac Studio Ver.1.[][] Datasheet		

<sup>\*1. 3</sup>D CAD data supports STEP/IGES

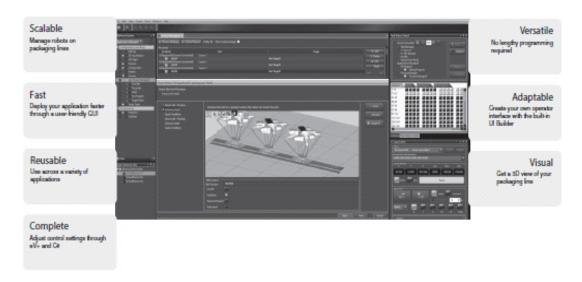

#### **Application Manager**

Sysmac Studio provides another layer of simplification for Application development, by means of the Application Manager modules. These modules enable advanced programming capabilities for Packaging (PackManager) and Vision (Robot Vision Manager) applications.

**PackManager** can manage scalable packaging lines from integration to deployment and step-by-step guidance without scripting. The software walks you through the configuration of packaging application by setting up process-specific items, such as controllers, robots, and conveyor belts.

#### Main Features:

- Process Manager optimizes the resources, decreasing idle time and maximizing the amount of parts processed per robot.
- Fully customizable for any line configuration and advanced load balancing.

**Robot Vision Manager** provides algorithms and tools for easily integrated vision systems into robotic applications. Camera calibration, part identification, and image processing tools are supported as part of this Manager.

Application Manager modules are configured through Sysmac Studio and executed on Omron's IPC Application Controller.

**Application Manager License Configuration** 

License	Part Number	Item	
PackManager	20409-000	nables full functionality of the PackManager software	
Robot Vision Manager	20410-000	Enables the Robot Vision Manager functionality and inspection tools library	
Dual (PackManager plus Vision)	20433-000	Enables functionality of both PackManager and Robot Vision Manager	

#### **System Requirements**

Item	Requirement			
Operating system (OS)	Windows 7 (64-bit version) / (Windows 10 (64-bit version)			
CPU	Intel® Core™ i5 or equivalent or faster recommended.			
Main memory	2 GB min.(8 GB recommended)			
Video memory	512 MB min.			
Hard disk	At least 1 GB of available space			
Display	XGA 1024 × 768, 16 million colors. WXGA 1280 × 800 min. recommended			
Communications ports	USB port (for hardware key), Ethernet port			
Supported languages	English, French, German, Japanese, Spanish, Italian, Korean, Simplified Chinese, Traditional Chinese			

## Standalone Robotics & Software

#### **Parallel Robots**

## Hornet 565

#### Parallel robot ideal for use in the food and beverage, pharmaceutical, and healthcare industries

- Programmable through ACE software and eV+ language, or through the familiar IEC 61131-3 when using ePLC Connect
- The amplifier and controller built into the robot reduces the number of cables
- Tracks up to a conveyor speed of 1.4 m/s
- Designed with a high payload to support multi-hand (multi-picking)
- Supports fast Pick & Place on a fast conveyor
- Helps reduce mounting cost and robot vibration
- Maximum working diameter 1,130 mm
- Working height 425 mm
- Maximum payload 8 kg
- Weight 52 kg

## Quattro 650H/HS

## Four-axis parallel robot achieves high speed and high precision

- Programmable through ACE software and eV+ language, or through the familiar IEC 61131-3 when using ePLC Connect.
- Four-axis arm evenly distributes the load on the robot
- Fast and high-precision conveyance and assembly
- Designed with a high payload to support multi-hand (multi-picking)
- Supports fast Pick & Place on a fast conveyor
- Meets the sanitary standards of the United States Department of Agriculture for prevention of product contamination
- Maximum working diameter 1,300 mm
- Working height 500 mm
- Maximum payload 15 kg
- Weight 117 kg

## i4-350L/450L/550L

## New i4L robot for precision machining, assembly, and material handling

- High payload, inertia, and repeatability in a compact size for use in digital assembly applications.
- Compact, easy to install design. Mountable on table or wall without additional HW. Available with bottom or rear interface panel orientations.
- Easy to service with high visibility, multi-colored LED light dome provides convenient indication of the robot status.
- Reach Options: 350 mm, 450 mm, 550 mm
- Maximum payload: 5 kg
- Weight 350: 15.1 kg; 450: 15.9 kg; 550 (180 mm): 16.4 kg; 550 (350 mm): 16.5 kg

## Cobra 450

# Mid-size SCARA robot for material handling, assembly, precision machining and adhesive application

- Programmable through ACE software and eV+ language, or through the familiar IEC 61131-3 when using ePLC Connect.
- Good repeatability for precision assembly
- High Payload for using tools for screw-driving and adhesive application
- Minimum footprint with separate controller
- Robot with integral power and signal cables
- Reach 450 mm
- Maximum Payload 5 kg
- Weight 29 kg

## **Articulated Robots**

## Viper 650

## Articulated robot for machining, assembly, and material handling

- Programmable through ACE software and eV+ language, or through the familiar IEC 61131-3 when using ePLC Connect.
- Diagnostics display enables faster trouble shooting
- High-resolution, absolute encoders to provide high accuracy, superior slow-speed following, and easy calibration
- High-efficiency, low-inertia Harmonic Drives and a lightweight arm to deliver maximum acceleration
- Reach 653 mm
- Maximum payload 5 kg
- Weight 34 kg

## **Articulated Robots**

## Viper 850

## Articulated robot for machining, assembly, and material handling

- Programmable through ACE software and eV+ language, or through the familiar IEC 61131-3 when using ePLC Connect.
- Diagnostics display enables faster trouble shooting
- High-resolution, absolute encoders to provide high accuracy, superior slow-speed following, and easy calibration
- High-efficiency, low-inertia Harmonic Drives and a lightweight arm to deliver maximum acceleration
- Reach 855 mm
- Maximum payload 5 kg
- Weight 36 kg

## **Robot Controllers**

## **SmartController EX**

## High-performance robot motion controller capable of high-speed processing

- Controls up to four robots
- Gigabit Ethernet
- 12 inputs/8 outputs
- Ultra-compact form factor for high footprint efficiency
- Integration with configuration software ACE to control complex mechanisms through user-friendly interface

## **Specifications**

	Item	Specifications
Part Number		19300-000
Grounding Method		Ground to less than 10 $\Omega$
Dimensions (Height × Depth × Width)		86 × 187 × 329 mm
Weight		2.6 kg
Power Supply		24 VDC±10%
Current Consumption		5 A
Power Consumption		120 W
Operation	Ambient Temperature	5 to 40°C
Environment	<b>Humidity Range</b>	5 to 90% (non-condensing)
Mounting		Panel mount, rack mount, stack mount, desktop
Communications Port		RS-232 (115 kbps), RS422/485, Gigabit Ethernet, DeviceNet
On-board I/O (Input/Output)		12/8
Conveyor tracking	j input	4

Dimensions (Unit: mm)

#### SmartController EX

#### Front panel

**Note:** Front Panel is provided with the SmartControllerEX.

## Additional I/O Options

## **Input Specifications**

Item	Specifications
Part Number	90356-30200/-30100/-40100
Rated Output Current	700 mA/point
Maximum Output Current	2.5 A at 50°C ambient 3.7 mA at 25°C ambient
ON Delay Time	100 μs max.
OFF Delay Time	150 μs max.

## **Output Specifications**

Item	Specifications
Part Number	90356-30200/-30100/-40100
ON Voltage	10 V min.
OFF Voltage	3 V max.
OFF Current	0.5 mA
Input Current	2.5 mA min. 7.5 mA max.
ON Delay Time	5 μs max.
OFF Delay Time	5 μs max.
Isolation Method	Photocoupler isolation
Current Consumption from I/O Power Supply	6 mA max. (at power supply voltage of 24 VDC)

## **Automation Control Environment (ACE)**

## ACE is a PC-based software package that easily manages Omron's entire portfolio of robots, controls, vision, and feeding systems

ACE software provides an easy-to-use environment to program and deploy applications ranging from simple pick & place to multi-robot belt-tracking lines. It allows you to increase productivity while streamlining configuration setup. ACE 4.0 shifts to an even more intuitive interface and provides superior data visualization.

a

- Fast emulation and 3D visualization for quick proof of concept
- Wizard-based user-friendly interface to calibrate and teach the robots
- Recipe Manager simplifies management of manufacturing process and handles a range of product variations, ideal for flexible automation to reduce changeover time
- Robot Vision Manager enables vision guided conveyortracking and AnyFeeder integration via wizards
- Robot Vision Manager 4.0 also includes vision inspection tools to improve quality assurance and traceability

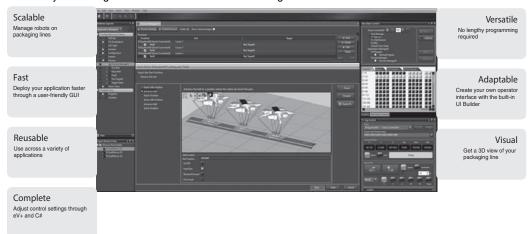

ACE provides another layer of simplification for Application development, by means of the Application Manager modules. These modules enable advanced programming capabilities for Packaging (PackManager) and Vision (Robot Vision Manager) applications.

**PackManager** can manage scalable packaging lines from integration to deployment and step-by-step guidance without scripting. The software walks you through the configuration of packaging applications by setting up process-specific items, such as controllers, robots, and conveyor belts.

#### Main Features:

- Process Manager optimizes the resources, decreasing idle time and maximizing the amount of parts processed per robot.
- Fully customizable for any line configuration and advanced load balancing.

Note: When ACE PackManager is used to configure an application, robot cycle time may vary between the SmartController EX and eAIB/eMotionBox.

**Robot Vision Manager** provides algorithms and tools for easily integrated vision systems into robotic applications. Camera calibration, part identification, and image processing tools are supported as part of this manager.

Application Manager modules run as part of ACE and are executed on Omron's IPC Application Controller.

## **ACE License Configuration**

License	Part Number	Explanation
ACE PackManager (for ACE 4.x)	20409-000	Enables full functionality of the ACE PackManager software.
Robot Vision Manager (for ACE 4.x)	20410-000	Enables the Robot Vision Manager functionality and inspection tools library.
Dual (PackManager plus Vision)	20433-000	Enables functionality of both PackManager and Robot Vision Manager

Note: When you create robot programs without using PackManager wizards and vision system, the ACE license is not required.

## **System Requirements**

Item	Requirement			
Operating system (OS)	Windows 7 (64-bit version) / Windows 10 (64-bit version)			
CPU	Intel <sup>®</sup> Core <sup>™</sup> i5 or equivalent or faster recommended.			
Main memory	2 GB min. (8 GB recommended.)			
Video memory	512 MB min.			
Hard disk	At least 1 GB of available space			
Display	XGA 1,024 $\times$ 768, 16 million colors. WXGA 1,280 $\times$ 800 min. recommended			
Communications ports	USB port (for hardware key), Ethernet port			
Supported languages	English, French, German, Japanese, Spanish, Italian, Korean, Simplified Chinese, Traditional Chinese			

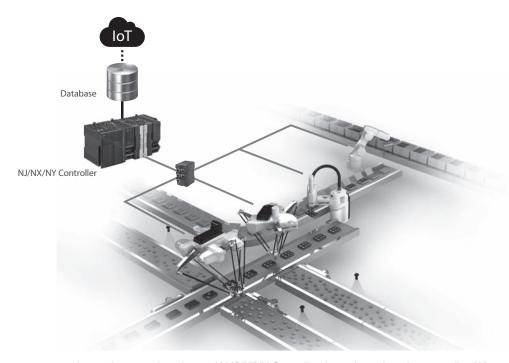

#### **Automation Control Environment (ACE)**

ACE is a PC-based software package that helps you quickly and easily set up your robot system. ACE is available to download from the Omron website: http://www.ia.omron.com/

## **ePLC Robot Control Library**

## No need to learn a new robot programming language Control robots directly from the NJ/NX/NY Controller

- The same instructions and programming method can be used to control any type of robot: parallel, SCARA, or articulated robot
- Robots can be controlled by using Function Blocks in Ladder or ST language
- Data on robots, controller, and other devices can be integrated and visualized
- Robots are connected to the NJ/NX/NJ Controller via EtherNet/IP. \*

<sup>\*</sup> The communication cycle time between the robot and NJ/NX/NY Controller depends on the robot controller. When the SmartController EX is used, the communications cycle time is 15 times faster than when the eAIB or eMotionBlox is used.

## **Function Block (FB) Specifications**

Name	FB name	Description
Set Tool Trans	ARB_SetToolTransform	Sets a tool system transformation to the robot.
Reset Tool Transform	ARB_ResetToolTransform	Resets the robot tool which is set to the robot.
Define Location	ARB_DefineLocation	Defines a position in the robot.
Define Pallet	ARB_DefinePallet	Defines all pallet information in the robot.
Reset Error	ARB_ResetRobotError	Resets any existing error in the robot.
Robot Control	ARB_RobotControl	Controls the main robot settings and monitors the robot status.
Teach Position	ARB_TeachPosition	Teaches the current robot position and configuration.
Input Output Signals	ARB_InputOutputSignals	Communicates with the robot through its digital inputs and outputs.
Teach Pendant Control	ARB_TeachPendantControl	Sends and receives information from the manual control pendant attached to the robot.
Read Latch	ARB_ReadLatch	Outputs the current robot position when an external trigger is input.
Move	ARB_MoveCommand	Moves the robot to a target position using a linear interpolation or PTP operation.
Pick And Place	ARB_PickAndPlaceCommand	Moves the robot to a target position in a three-part motion.
Jog	ARB_Jog	Moves the specified joint or axis of the robot.
Align Tool Command	ARB_AlignToolCommand	Rotates the tool to be aligned with the world coordinate system.
Move Arc Command	ARB_MoveArcCommand	Moves the robot to the specified target position along arc trajectory.
Move Circular Command	ARB_MoveCircularCommand	Moves the robot along a circular trajectory, passing specified two positions.
Define Belt	ARB_DefineBelt	Defines a conveyor belt.
Belt Read Latch	ARB_BeltReadLatch	Outputs the belt encoder value of the conveyor when an external trigger is input.
Track Belt	ARB_TrackBelt	Enables tracking a workpiece.

#### **Sysmac Library**

The Sysmac Library is a collection of software functional components that can be used in programs for the NJ/ NX/NY Controllers.

Please download it from following URL and install to Sysmac Studio Automation Software. http://www.ia.omron.com/sysmac\_library/

The Adept Robot Control Library allows you to control parallel, SCARA, and articulated robots manufactured by Omron Adept Technologies Inc. from the NJ/NX/NY Controllers by using the same instructions and programming methods.

## Robot Accessories

## **Vision System**

## IPC Application Controller

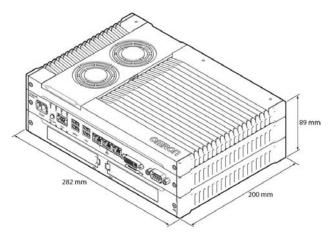

# State-of-the-art industrial computer optimized for vision guided robotics applications

- Built-in vision processor with 128GB SSD, optimized to process high resolution, high frame rate images, with ACE 4.X
- System configuration by PC, include Sysmac Studio
- Appear feature about Robot Vision Manager, PackManager and Recipe Manager
- Unique simplified thermal design to maximize uptime
- GigE PoE and USB 3.0 ports for increased connectivity and fast datatransmission
- Supports up to 8 cameras simultaneously
- Compatible with Omron UPS S8BA Series
- Compact design to minimize panel space, allowing 2 mounting orientations

	Item	Specifications	
Part Number		AC1-152000	
Weight		3.8 kg	
Grounding Method		Ground to less than 100 $\Omega$	
Dimensions (Height $\times$ D	Depth × Width)	89 × 200 × 282 mm	
CPU		Intel <sup>®</sup> Core <sup>™</sup> i5-7440EQ	
	Main Memory	8 GB DDR4	
Main System	Trusted Platform Module	Available	
	Graphics Controller	Intel® HD Graphics	
	Watchdog	Yes	
Operating System		Windows 10 lo T Enterprise LTSB - 64 bit	
Storage Devices	Hard Drive	128 GB SSD Additional 3.5 inch hard drive slot available Additional SD memory card slot available, up to 32 GB capacity	
Power Supply		20.4 to 28.8 VDC	
Power Consumption		97.6 W (when using 2x USB 3.0 and 4x POE Cameras)	
	Power Connector	24 VDC	
	I/O Connector	2 inputs (UPS signal and power OFF control) and 1 output (Industrial Box PC power state)	
Communications Port	Ethernet Connector	Gigabit Ethernet x 3, Gigabit Ethernet with POE x 4 3 W max power consumption per port	
	USB	USB 3.0 x 4 (3 m max cable length), USB 2.0 x 2 (5 m max cable length)	
	Display	DVI-Connector x 1 (up to 1,920 x1,200 @60 Hz)	
	RS-232C	Standard DSUB9 connector (Non-Isolated)	
Dettem	Part Number	CJ1W-BAT01	
Battery	Service Life	5 years at 25°C	
Fa., 1114	Part Number	NY000-AF00	
Fan Unit	Service Life	70,000 hours of continuous operation at 40°C with 15% to 65% relative humidity	
LED		PWR, ERR, HDD, RUN	
Operation	Ambient Temperature	0 to 55°C for operation, -20°C to 70°C for storage	
Environment	Humidity Range	10 to 90% (non-condensing)

		POE	3 W max.		

Note: Refer to the IPC Application Controller User's Manual (1632) for detail.

\* The total power consumption is the sum of the power consumption of all items that are installed in your Industrial Box PC.

To guarantee S8BA UPS operation in combination with our IPC, the specified combination of UPS and power-supply must be used.

Item	Minimum power requirements	
Power supply	240 W	120 W
LIPS	120 W/	120 W

#### **Environmental Specifications**

	Item	Specifications
	Ambient operating temperature *1	0 to 55°C
	Ambient storage temperature *1	-20 to 70°C
	Ambient operating humidity *1	10% to 90% with no condensation
	Ambient storage humidity *1	10% to 90% with no condensation
	Operating atmosphere	No corrosive gases
Operation environment	Altitude	2,000 m max.
	Noise resistance (during operation)	Conforms to IEC61000-4-4, 2 kV (power lines)
	Vibration resistance (during operation)	Conforms to IEC 60068-2-6. For a product with an SSD: 5 to 8.4 Hz with 3.5 mm single amplitude and 8.4 to 150 Hz with 9.8 m/s² for 10 times each in X, Y and Z directions. For a product with a HDD the vibration resistance depends on the mounting orientation \$\displays 2.
	Shock resistance (during operation)	Conforms to IEC 60068-2-27. 147 m/s², 3 times in each X, Y and Z directions
	Installation method	Book mount, Wall mount
	Pollution degree	2 or less: Conforms to JIS B3502 and IEC 61131-2.
Applicable sta	andards *3	EU Directives: EMC Directive 2014/30/EU (EN 61131-2) and RoHS Directive RCM, EAC

- \*1. The allowed ambient operating temperature and ambient humidity depend on product type, CPU type, mounting orientation, and storage device type.
- \*2. Vibration resistance depends on the IPC Application Controller's mounting orientation and storage device type:

Mounting orientation	SSD
Book	9.8 m/s <sup>2</sup>
Wall	9.0 11//5

\*3. Refer to the OMRON website (www.ia.omron.com) or contact your OMRON representative for the most recent applicable standards for each part number.

## **Vision System**

## 3D Pick Manager Solution

# Fully integrated 3D part picking solution using Photoneo 3D PhoXi Scanners and easy-to-use 3D Pick Manager

- Click-through sample application wizard quickly guides the user through part & bin setup, camera settings, and picking sequence.
- 3D Pick Manager + Calibration kit includes all the hardware and software necessary to get up and running for 3D pick applications on the Viper robot.
- Available on Viper 650/850 stand-alone robot series
- High-quality Photoneo PhoXi 3D Scanner support fully integrated into the ACE software platform
- Easily upload part CAD files or use simply geometry to teach target parts
- 3D Pick Manager bundles include:
  - Photoneo PhoXi 3D Scanner
  - PoE Cable + Power Injector
  - Ethercat Cable (From PoE to IPC)
- 3D Scanner Calibration kit includes all hardware necessary to teach the robot position relative to the 3D scanner

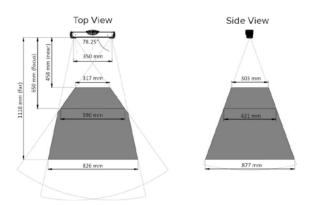

Product name		3D Pick Manager		
	Size	Small	Medium	Large

#### PhoXi 3D Scanner Medium

PhoXi 3D Scanner Large

## **Additional Accessories**

Туре	Calibration Kit
Part Number	21857-900
Overview	Calibration kit is necessary to calibrate the robot arm position to the 3D Scanner
	An IPC Application Manager (pn: AC1-152000) is required to run the 3D Pick Manager SW and be connected directly to the 3D Scanner

## Industrial Cameras

### Industrial cameras fully integrated with robots

High performance industrial cameras that seamlessly communicate with robots and control environment. The portfolio features the latest CMOS sensor technology to use in automated processes.

- GIGE
- Well-suited to a wide range of robotics applications with high image quality,
- high frame rates, and compact design
- Compatible with all 35+ powerful tools in ACE for vision guidance and inspection, adding integrated vision system by a single click into your program
- Bundled with cables and accessories to connect with robot

ORT Part Number	Image Elements	Effective Pixels	Color / Monchrome	Frame Rate	Lens Mounting	Power Supply	Bundled Accessories	General

Note: Refer to Industrial Camera datasheet, Cat.No. 1884-E for detail.

## Connection

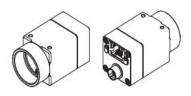

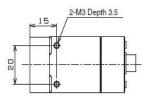

#### Pin Assignment

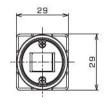

Pin No.	Signal name	I/O	Signal voltage
1	POWER IN	IN	10.8 to 26.4 Vdc
			Low: 1.0 V or less
2	Isolated input	IN	High: 3.0 to 26.4 V
	(Line0)		* Potential difference between isolated input and isolated I/O common
3	Non-isolated I/O (Line2)	IN / OUT	3.0 to 26.4 V/Open Collector
4	Isolated output (Line1)	OUT	Open Collector
5	Isolated I/O common	IN	
6	GND	IN	0 V

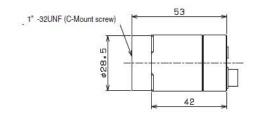

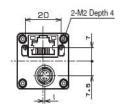

Dimensions (Unit: mm)

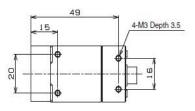

## Pendant

## T20 Pendant

## **Excellent operability and ergonomic design**

- Tested for a 1.5 meter drop onto industrial flooring
- Displays custom messages
- Emergency stop switch (dual channel circuit)
- Enable switch on back
- Bright display with backlight and contrast adjustment

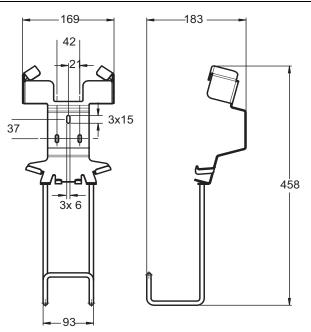

#### **Dimensions**

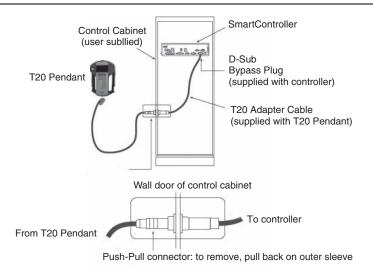

(Unit: mm)

### **Wall Bracket Dimensions - Optional**

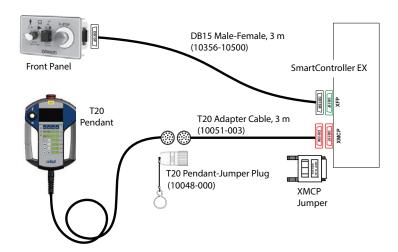

### **Connection to SmartController**

## **Panel and Front Panel Installation**

Name	Details	Part Number
	T20 Pendant, 10 m Cable	10046-010
Pendant	T20 Pendant-Jumper Plug	10048-000
rendant	T20 Pendant Wall Bracket	10079-000
	T20 Adapter Cable, 3 m	10051-003

## Recommended FlexFactory Product

## AnyFeeder

### Feeding bulk parts for alignment and assembly

- Flip, forward, and backward for easy pickup by robot in combination with vision
- Pickup after flipping parts to identify front or rear
- Easy configuration of AnyFeeder, vision, and robots using wizards
- Flexible feeding of various parts registered in Recipe Manager in ACE or Sysmac
- Available with all part numbers of SCARA, articulated, and parallel robots

## **Recommended JR3 Product**

## **Force Sensor**

## Extending robot capabilities for advanced tactile applications

- Measurement of forces and moments in all three axes
- Digital output connected directly to robot controller
- Interaction with ACE (eV+) by means of commands and modes of operation
- Compatible with eCobra Standard and Pro, Viper, Hornet, and Quattro robots

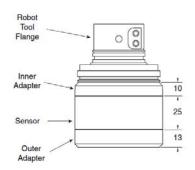

### **Ordering Information**

	Item	Specifications
JR3 Part Number		67M25A3
Omron Part Number		Go to Options table
Outer Diameter		67 mm
Thickness		25 mm
Body Material		AL 2024
Weight		175 g
Nominal Accuracy (Al	l axes)	±1.0%
Operating Temperatur	re .	-40 to 65°C
Protection		IP40
	Standard Measurement Range	±200 N
F <sub>x</sub> and F <sub>y</sub> Constants	Digital Resolution	0.050 N
	Single-axis Overload	930 N
	Standard Measurement Range	±400 N
F <sub>z</sub> Constants	Digital Resolution	0.100 N
	Single-axis Overload	3870 N
	Standard Measurement Range	±12 N·m
M <sub>x</sub> and M <sub>y</sub> Constants	Digital Resolution	0.0032 N·m
	Single-axis Overload	58 N·m
M <sub>z</sub> Constants	Standard Measurement Range	±12 N·m
	Digital Resolution	0.0032 N·m
	Single-axis Overload	48 N·m
Operating Voltage		9 to 12 VDC
Sample Rate		8,000 Hz
Sensor Output Port		RJ-11

Dimensions (Unit: mm)

#### Sensor, Inner/Outer Adapter for eCobra/Hornet/Quattro

#### Sensor, Inner/Outer Adapter for Viper

Outer adapters have the same hole and thread pattern as robot tool flanges.

## **Options**

Туре	Kit, Intelligent Force Sensing, mounting and cabling	Kit, Sensor mounting and cabling (No sensor)	
eCobra 600/800/800 inverted	14161-100	14161-105	
Viper 650/850	14161-200	14161-205	
Hornet 565 and Quattro 650/800	14161-300	14161-305	
Overview	Force sensor, with mounting adapters, flanges, and cabling per robot type	Mounting adapters, flange, and cabling. No sensor included	
Purpose	Complete installation kit for a customer without a force sensor	Kit for customers who have an existing JR3 67M25A3 force sensor, and require spares or adapters for another robot type	
Common Cables/Accessories	Triplex Cable (DB9 M to eAIB or eMB-60R XBELTIO) Adapter Plate (inner) Adapter Plate (outer) Intelligent Force Sensing User's Guide		
Cobra, Hornet and Quattro only Cables	Upper Cobra Cable (RJ11 6-pin to DB25M) Lower Cobra Cable (Robot base to Triplex EXPIO - DB25F - DB9)		
Viper only Cables	Upper Viper Cable (RJ11 6-pin to CN21) Lower Viper Cable (CN20 to Triplex EXPIO- DB9 F)

## **Terms and Conditions Agreement**

#### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

#### Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

#### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### **Programmable Products.**

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

#### **Errors and Omissions.**

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Note: Do not use this document to operate the Unit.
